

UNISYN

A division of GE Healthcare

Probe Care Solutions Fleet Health Check

Scientific evidence indicates over 1 in 3 probes in clinical use today have some form of failure, which may put clinical diagnosis at risk^{1,2}.

How can you ensure that your ultrasound system is performing as expected?

Unisyn supports your ultrasound clinical & maintenance activities by providing multi-brand probe testing solutions, helping you optimize your clinical performance, and protect your investment in the most complex and expensive piece of your ultrasound imaging chain.

FLEET HEALTH CHECK

supports your multi-brand
ultrasound practice
by helping you

Identify
damaged
probes before
they impact your
clinical activity

A comprehensive health check of your fleet of probes helps you reduce the incidence of damaged probes in use and the possible misdiagnosis and re-examinations.

Increase
visibility
on the health of
your probe fleet

Each check allows you identify at-risk probes and help make informed decisions and prioritize investment. Regular health checks can help ensure full visibility on the health of your multi-brand portfolio overtime and minimize the risk of unexpected expenses.

Know where you stand

Unisyn experts evaluate your ultrasound probes directly on your site, with minimal disruption of your daily activity.

Each fleet health check includes:

Visual inspection
of key elements
of each probe

Performance tests
Capacity testing
Sensitivity testing

Access the information you need

Following each check, you will receive:

- an executive summary of your fleet's performance
- detailed description of each probe failures
- testing reports for each probe assessed
- recommendations enabling informed decision-making on how to improve your fleet's health
